

## ■ DESCRIPTION

Dynamic View is a smart media player that allows you to display EverAlert platform alerts, messages, and communications on a broad range of large-format TV monitors through HDMI input. With the ability to broadcast on larger screens, organizations can more clearly communicate daily messages, precise synchronized time, and emergency alerts such as severe weather, lockdown protocols, fire drills, and more. Larger screens are particularly effective for large conference rooms, break or lunchrooms, common areas, and gymnasiums.
